

At Derrymount, our **intent** is to give every child a broad and balanced science curriculum that will maximise their potential whilst supporting any additional needs.

We want our CYP to deepen their natural curiosity and to use this to learn to understand how the world we live in is made up, and how everything works together within it.

We want to provide exciting, practical hands-on experiences that encourage curiosity and questioning. Our aim is that these stimulating and challenging experiences help every child secure and extend their scientific knowledge and vocabulary, as well as promoting a love and thirst for learning.

CYP will study carefully designed and developed pathways at KS2 and KS3, with the need of every child in the forefront of our minds. They will follow the science National Curriculum to prepare them for further education and the opportunities, responsibilities and experiences of later life.

Our CYP can choose to study GCSE science at KS4, and/or to continue to stimulate their little grey cells with our fun science strand where they will be able to unlock some of the mysteries of the world with our enrichment afternoons.
